... pan for GOLD!

By Liam Wiedersberg

List of ingredients/supplies:

- You can buy a gold panning kit
- The most important part you need is the gold pan
- It looks like a pan for cooking but mine is made of plastic
- You need to go to a place that is known for gold

Step by step instructions ...

Hi, my name is Liam and I will show you how to do gold panning.

1) First, you need to take your gold panning supplies to a place that is known for gold. I went to the Yuba River to find gold. The Yuba River is in the Sacramento area.

2) Second, you need to separate the gold from the water by spinning it around for a while until you see gold.

3) Third, you need to go in the sun so you can see the gold easier and use your hand or a tool to get the gold out.

4) Fourth, you need to put the gold in tiny bottles that are made out of glass because the gold is not that big.

Lastly, you can look at your glorious gold for hours.
